--SEE OFFICE ACTION ON THE FOLLOWING PAGES--

Prosecution is reopened upon a finding of new art:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Japan Patent Document 58-079915 ('915).

'915 teaches a composition comprising a melt extruded water soluble polymer, including hydroxypropyl cellulose, and an active agent (page 1 claims 1-2) melt extrusion at 100-200°C is disclosed (page 4 last paragraph bridging to page 5). Fluorouracil, which is crystalline (from water) and decomposes at 282°C, is specified (page 4 line 3).

Claims 1, 2, 5, 10, 21-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 21 "suitable" is vague. How so suited?

No claims allowed.

A handwritten signature, possibly "J", is written over a faint, rectangular stamp. The stamp contains text that is mostly illegible but appears to include "RECEIVED" and "FEB 19 2004".
